Jim Hall introduces Aluminum Work Boat Conversions. Over 100 Striker models ready for conversion to full work duty. Striker ranges are: 34, 37, 41, 44, 50, 54, 58/60, 62, and 70. These vessels can be converted very easily compared to most recreational boats ever built! All types of small boat operations can benefit for several decades using this hull design. Factory plans are available or in house designer of work boats would be sufficient as long as classifications are within range. This Hull design will amaze the most experience Captains. Converting a Striker to Work Boat Status is not an Impossible Dream. With proper planning and with a good Work boat yard you'll be in business in no time and with a tremendous savings over new construction. With the amount of Striker Hulls out there the savings are over 100 million dollars if all vessels were converted within the next few years! There is a Big money savings here with a very well known vessel. If your organization needs a work boat badly and is over budget. Look into a real clean-cut conversion to meet your needs with a Striker Hull and save several hundred thousand dollars. Some organizations need 2-3 or more boats and with the cost of new sky high, conversion makes sense and is very possible, since the Hulls are built inverted much of the new work can completed Dockside and most yards will welcome and be very eager to handle your needs. Striker pilot vessel work boat conversions make sense for many type of operations and also there is NEW design Striker vessels including High speed VOLVO running gear and underwater lines! New Boat/Boot construction. News!!! Financing for certain projects.

Regards,  
Jim Hall

### Specifications

Vessel type: Aluminum Work Boat

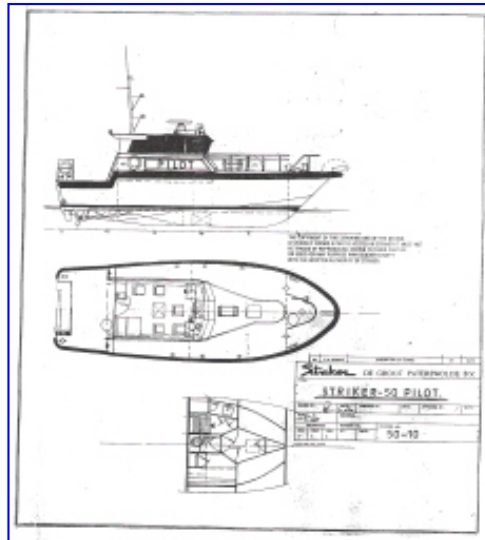

Designer: de Groot or in-house

Builder: Striker
